## SUMMARY

Full Stack Software Engineer with experience designing and developing scalable web applications using MongoDB, Express.js, React.js, and Node.js (MERN). Proficient in building RESTful APIs, implementing JWT-based authentication, and enforcing role-based access control (RBAC). Experienced in microservices architecture, backend system design, and deploying applications on AWS, with a stronger inclination toward backend engineering.

## EXPERIENCE

**Aaptatt Pvt. Ltd.** | *Software Engineer* Oct. 2025 – Present

- Developed a full-stack Employee Management System using the MERN stack, implementing RESTful APIs, JWT-based authentication, and role-based access control (RBAC) with cookie-based session management.
- Built a microservice to validate and monitor data quality across distributed systems, successfully integrating it into a production application with an 80% integration success rate.
- Automated critical application workflows, achieving 85–90% user journey coverage and improving efficiency by 40–50%.
- Debugged and optimized a client-facing application, resolving module-level issues and improving performance, reliability, and user experience.

**Celebal Technologies** | *Celebal Summer Intern* Jun 2024 – Aug 2024

- Gained hands-on experience with Microsoft Azure services including Virtual Networks (VNet), Virtual Machines (VM), and Network Security Groups (NSG) to design and manage secure cloud infrastructure.
- Designed and deployed a three-tier architecture on Azure using multiple VMs, implementing VNet peering and NSGs to ensure secure, scalable, and efficient network communication.

**Techplement** | *Cloud AWS Intern* May 2024 – May 2024

- Led a team of four to deploy a scalable web application on AWS using Amazon EC2, Elastic Beanstalk, and Amazon RDS, ensuring high availability and reliable application performance.
- Configured Amazon EC2 instances and integrated Amazon RDS for backend database operations, improving deployment stability and database reliability.

## PROJECTS

**Employee Management System** | **Internal Company Project** | (MERN, Tailwind CSS) Oct 2025

- Developed a full-stack Employee Management System using the MERN stack, implementing RESTful APIs, JWT-based authentication, and role-based access control (RBAC) with cookie-based session management.
- Built role-based dashboards for Admin and Employee roles, enabling differentiated access, views, and workflows based on user permissions.
- Designed a responsive and intuitive UI using React.js and Tailwind CSS, improving usability and streamlining HR workflows.

**EduNexis (Education Platform)** | (MongoDB, Express.js, React.js, Node.js, Tailwind CSS) *GitHub* | *Live* *Oct 2024*

- Developed a MERN-based EdTech platform with RESTful APIs, JWT authentication, bcrypt password encryption, and RBAC for multi-role access control.
- Built an Admin and Instructor dashboard for managing courses, enrollments, and platform content with role-specific access.
- Integrated Razorpay API for secure payment processing and implemented backend workflows for course management.
- Implemented email notification and OTP verification system for user authentication and account security.

## SKILLS

**Programming Languages**: C++, Java, JavaScript, HTML, CSS

**Framework/Libraries**:Express.js, React.js, Node.js, Tailwind CSS

**Databases**: MySQL, MongoDB

**IT Constructs**: DSA, OS, DBMS, OOPs

**Authentication**: JWT (JSON Web Tokens), RBAC

**Tools**: Git/GitHub, VS Code, IntelliJ, Postman, JIRA, Vercel

## EDUCATION

**Noida Institute Of Engineering And Technology** Nov. 2021 - Jul. 2025
*Bachelor Of Technology(Information Technology)* *CGPA: 7.7/10*

**Sushant Public School** Jul. 2021
*Class XII, PCM*

**D.A.V Public School** Apr. 2019
*Class X*
