EDUCATION

The NorthCap University, Gurugram, India <i>B.Tech CSE</i>	2022 – 2026 (Expected)
Doon Public School, India Class XII (CBSE) — Aggregate: 82%	2020 – 2021
Doon Public School, India Class X (CBSE) — Aggregate: 76%	2018 – 2019

SKILLS

Programming Languages: Java, Python

Machine Learning & AI: Supervised & Unsupervised Learning, CNN, Computer Vision (OpenCV), Model Training, Validation & Evaluation, Feature Engineering & Data Preprocessing

Frameworks & Libraries: FastAPI, Streamlit

Database Management: MySQL, PostgreSQL

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, JDBC

Tools & Platforms: Git, Microsoft Azure, AWS, Tableau

Additional Skills: Problem-Solving, Communication Skills

WORK EXPERIENCE

Octanet Pvt. Ltd. Intern - Developed an ATM model in Python using OOP for modularity and scalability. - Optimized performance, saving 15 hours of work time.	May 2024 – June 2024
Unique Training Solutions Trainee - Earned Azure AI Fundamentals 900 certification. - Completed both self-paced and instructor-led training.	Oct 2024 – Nov 2024

PROJECTS

Urban Air Quality Toolkit Developed an interactive toolkit for detecting urban pollution hotspots using crowdsourced data, real-time path analysis, and Tableau visualizations.	May 2024 – Jul 2024
Conversational AI Calendar Booking Agent - Built a conversational AI agent using FastAPI, LangGraph, and Streamlit to schedule meetings on Google Calendar via natural language input. - Integrated Google Calendar API for real-time appointment booking and retrieval. - Enabled smooth user interaction through a Streamlit frontend with intent recognition and slot filling. - Demonstrated understanding of backend development, API integration, and agent frameworks.	Jul 2025
WorkGuardAI – Excavation Monitoring (CV & ML) - Built an OpenCV pipeline to extract frames from video data for ML inference. - Assisted in training and validating vision-based models for site monitoring. - Worked with real-world video data and ML workflows.	Nov 2025
Hybrid Deep Learning for Stock Trend Reversal - Trained CNN models for pattern detection in financial time-series data. - Performed data preprocessing, feature engineering, and model evaluation. - Contributed to a hybrid CNN–LSTM ensemble approach.	Nov 2025

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Azure AI Fundamentals 900 | Microsoft
- Java Beginner To Master | Udemy
- AWS Academy Data Engineering | AWS
