

EXPERIENCE

Solution Developer

Jan 2025 – Present

Company - Tata Technologies

- Designed and maintained CI/CD pipelines to automate build, security scanning and deployment workflows, reducing manual release efforts, and improving deployment consistency.
- Containerized frontend applications and developed data analytics portals for Tata Motors customer using React, Context API, and integrated RESTful APIs for efficient data fetching, and real-time synchronization.
- Collaborated with backend and infra teams to troubleshoot environment-specific issues across staging and production
- **Tech stack** -Jenkins, Reactjs, JavaScript, Docker, Redux, AWS, Context API, Checkmarx, GitHub

Cloud Intern

Jul 2023 – Aug 2023

Company - Field Feet Consulting

- Assisted in cloud migration strategy planning using AWS services including FSx, EC2, S3, VPC, and NetApp storage, contributing to performance optimization and scalable storage architecture.
- Worked with AWS CloudSync to automate data transfer workflows, improving data synchronization efficiency between on- prem and cloud storage systems.
- Supported configuration and provisioning of cloud resources, gaining practical experience with networking components such as subnets, routing, and security policies.
- Documented cloud processes and recommended improvements, enhancing knowledge transfer and cloud adoption readiness for internal teams.

EDUCATION

University of Petroleum and Energy Studies

B.Tech Computer Science with major in Cloud computing and Virtualization and minor in DevOps.

2020 – 2024

PROJECTS

CI/CD Pipeline for The Inside-Story – News Portal

- Developed a fully responsive news portal delivering real-time updates and created a CI/CD pipeline using Docker, Jenkins & SonarQube for automated builds, quality checks, and deployment workflow.
- Implemented versioned image builds to support rollback capability and traceable releases
- Technology Stack: React, Docker, Jenkins, SonarQube

DataFusionX – Containerized Dashboard Deployment

- Built a dynamic dashboard system using React, offering advanced visualization features including graphs, revenue analytics, Kanban board & calendar.
- Extended the application into a containerized deployment model and orchestrated it using Kubernetes.
- Technology Stack: React, ECharts, Kubernetes, Docker, YAML

TECHNICAL SKILLS

- **DevOps & Cloud:** Jenkins, Docker, Terraform, Grafana, Prometheus, AWS (EC2, S3, EBS, VPC), Linux, CI/CD, SonarQube, Git/GitHub, Kubernetes, YAML
- **Programming:** React, JavaScript, Tailwind CSS, Context API , Nodejs(Basic), Postman, MongoDB

ACHIEVEMENTS/CERTIFICATIONS

- AWS Academy Graduate - AWS Academy Cloud Foundations
- Engaged as apart of PwC's prestigious Launchpad program, actively participated in comprehensive analytical training to develop proficiency in data-driven decision-making and problem-solving methodologies
